

SECURITY OPERATIONS CENTER by ANECT

SEE — ANALYZE — REACT

30 years

of experience with operational monitoring

99,9 %

SLA, which we have held long term

24/7

Continuous monitoring and availability of L1 specialists

ISO

Fully certified by TF-CSIRT, ISO and others.

Why our SOC?

- We combine operational and security monitoring.
- We have a wide team of experts and can help you with a multitude of different technologies.
- We can help you optimize the costs associated with log management and SIEM/SOAR.
- The architecture of our service allows us to be technology and supplier independent.
- Active threat hunting. We notify you of vulnerabilities and threats.
- We monitor new threats, modify and create new detection mechanisms.
- We evaluate monitoring coverage and highlight weak points.
- We reflect your specific IT environment and needs.
- We meet with you regularly.

Main advantages:

Proactive protection

Constant monitoring and immediate response to security incidents.

Advanced detection and automation

AI, machine learning and automation for effective response to different types of threats.

Flexibility

Customizable for different types of businesses, on-prem or in the cloud.

Reduction of cyber risks

We minimize losses and negative impacts on your business.

Customer Testimonials:

„We chose ANECT because they were able to advise us on how to deal with a very heterogeneous technology environment and how to deploy SOC-type security monitoring into it.“

What technologies do we primarily use?

Log Management

Logmanager

SIEM
